Conformity regarding Impact test Exemptions

OWNER:- PKN ORLEN

CONTRACTOR:- HYUNDAI ENGINEERING CO. LTD.

VENDOR:- WIKA KOREA

MANUFACTURER:- WIKA PROCESS SOLUTIONS INDIA PVT. LTD. INDIA

PROJECT:- PKN ORLEN OLEFINS EXPANSION PROJECT

We have verified the essential safety requirements of Materials as per Annex I, paragraphs 4 and 7 of PED 2014/68/EU Directive, and confirmed that supplied materials comply these requirements.

We also verified the impact test exemptions criteria mentioned in the PMA for applicable materials and found them acceptable.

The previous PED Notified Body was TSU (NoBo number 1299). During the change of the manufacturer's company name (from Micro Precision Products Pvt. Ltd. to WIKA Process Solutions India Pvt. Ltd.), the PED Notified Body was also changed to the current Notified Body, ECM (NoBo number 1282), as of February 2025.

Although the materials for this project were supplied under the PED certificate issued by TSU (NoBo-1299) during 2023-2024, TSU is no longer the responsible Notified Body. Consequently, ECM (NoBo-1282) has taken over the responsibility for ensuring compliance with the essential safety requirements for materials as per Annex I, paragraphs 4 and 7 of the PED 2014/68/EU Directive.

ECM reviewed and confirmed the vendor's PMA. The conformity regarding impact test exemptions follows the approved PMA. Therefore, not all materials require an impact test at -29°C. The Notified Body (ECM) confirmed that the supplied materials are suitable for use in plants with a minimum temperature condition of -29°C. The CE marking (CE no. 1299) on the nameplate and the issued CE/PED certificate remain valid and do not need to be reissued.

Notified Body : Ente Certificazione Macchine Srl
